

Catalogue  
Clinker brick slips  
2019/2020

**VALUES**  
**THAT WORK.**  
**STATEMENTS**  
**THAT FIT.**

**BRICK 60** NEW

Multifaceted clinker details –  
strong proportions.

20

**BRICKWERK** NEW

Expressive coal firing and  
ring furnace look, innovatively accented.

24

**WASSERBRAND** NEW

Softly nuanced water-struck contouring  
on the full body.

28

**KONTUR** UPDATE

Perfectly natural.  
Fusion finish. Clinker body.

32

**STILTREU**

Agreeably imperfect.  
Architectural, exciting and subtle.

40

**RIEGEL 50**

Announced: Long format for  
particularly straight-edged design

44

**HANDSTRICH**

Embodiment of old values.  
environmentally sound, high-technology extrusion.

48

**STEINLINGE**

Up to date. Visible brickwork with  
antique look. Modern handling.

52

**GLANZSTÜCKE**

Retro-brick with shine effect.  
Extra slim. Long shape.

56

**ZEITLOS**

The high tech patina brick-slip in sintered clinker quality and premium strength.

60

**KERAPROTECT®**

The distinctive classic.  
Rough and sandy protected.

66

**KERALETTE®**

Against wind and weather.  
And too high energy costs.

70

**KERABIG®**

Natural stone look in an  
economically large size.

76

Enhance wall decorations with  
clinker brick slips – inside and out.

**STATEMENT  
WALLS WITH  
CLINKER  
BRICK SLIPS.**

Clinker brick slip walls do not crumble.  
Even if you scratch the surface.

Our clinker brick slips range from  
understatement to statement.

In a variety of textures.  
From soft water-struck effects  
or a striking coal-fired look.

In classic NF/DF formats.  
Or in the sophisticated bar format  
with a length of 60 cm.

**So the facade is not just a facade,  
it's a real statement.**

For eye-catching  
indoor wall decoration.

**STATEMENT  
WALLS.**

**KITCHENS.  
HALLWAYS.  
BATHROOMS.  
WALL PANELS.  
STAIRS.**

A modern interior space featuring a prominent dark brick fireplace with a glass-enclosed firebox. To the left, a dining area is visible with a dark wooden table, black chairs, and three pendant lights. Large windows and a glass door on the right provide ample natural light and a view of the outdoors. The floor is made of light-colored wood planks.

**LIVING  
ROOMS.

# BRICK 60 NEW

MULTIFACETED CLINKER  
DETAILS – STRONG  
PROPORTIONS.

#### **IMPOSING CLINKER CONTOURING IN AN IMPRESSIVE EXTRA LONG FORMAT.**

Brick 60 is the result of cutting-edge high-tech clinker engineering - extruded in impressive 60 cm length full-body. The innovative surface contouring has an old-style authentic appearance, but with modern accents. In an expressive coal-fired look. Or gently rough water-struck. Brick 60 defines a new dimension of clinker brick slips. In terms of format. And appearance: extra long. Impressive. State of the Art.

# BRICKWERK NEW

EXPRESSIVE COAL FIRING AND  
RING FURNACE LOOK,  
INNOVATIVELY ACCENTED.

8140/650  
Gepard Surround SU11 F03M floor tiles. Catalogue available separately or at: [www.gepardi.ch](http://www.gepardi.ch)

## AUTHENTIC COAL FIRING AND RING FURNACE CONTOURING ON FULL BODY.

Intensive colouring, pronounced bulges and prints, set marks, burn outs and sooty smoke flags on the firing skin: authentic and innovative, Brickwerk reinterprets the typical coal firing and ring furnace look of historic clinker bricks.

Entirely without aggregates such as coal or peat, the traditional clinker production is revolutionised with state-of-the-art, high-tech glaze technology. Innovative surface technology powerfully accentuates the surface of the Brickwerk clinker brick slips, which are coloured right through. Haptic as well as optical effects. Intense colour brilliance; full of character. While also being completely natural and resource-friendly. Brickwerk is available in six colours in NF/DF format.

# BRICKWERK <sup>NEW</sup>

# WASSERBRAND NEW

GENTLY ROUGH  
WATER-STRUCK LOOK  
WITH MODERN ACCENTS.

81140/670  
 Capri, Surround 6111 PopM, 100 tiles. Catalogue available separately. [www.papillon.de](http://www.papillon.de)

## CONFIDENT HISTORICAL WATER-STRUCK CONTOURING ON THE FULL BODY.

The light nuanced shades appear lovely but still sharp. The gently rough surfaces and detailed structures are furrowed by water and powerful. It is the skilful blend of untamed and yet delicate accents that gives this simple yet expressive clinker brick slip its striking contemporary look. Because, here, the look of historical water-struck bricks is not manufactured in traditional solid brick, but extruded as a modern clinker brick slip with innovative surface technologies.

# WASSERBRAND NEW

## POWERFUL. TENDER. UNTAMED.

# KONTUR

PERFECTLY NATURAL.  
FUSION FINISH.  
CLINKER BODY.

8020/482

#### TRADITIONAL CLINKER LOOKS INTERPRETED WITH MODERN CONTOURING.

Targeted highlighting for maximum effect. Contouring is the name of a style that is currently on trend, which gives a natural surface a particularly rounded and modern feel by means of strategic accentuation using the latest surface technology. Here, traditional clinker production techniques are combined with high-tech glaze technology to create a new generation of clinker brick slips: Manufactured in fusion finish.

In the classic DF/NF or long format, with three surfaces. Textures created using smooth engobes, characteristic water-struck surfaces or fire and melted effects with authentic signs of wear – with Kontur, traditional clinker looks have been interpreted and perfected with modern contouring.

# STILTREU

AGREEABLY IMPERFECT.  
ARCHITECTURAL,  
EXCITING AND SUBTLE.

7766/452

**SUBTLY BALANCED “USED LOOK”. CHARMINGLY AUTHENTIC.  
BUT STATE-OF-THE-ART AND UNIVERSAL.**

Materials with character and soul are a current trend. Architecturally, they provide an exciting contrast to modern reduced design. They are like a soothing anchor for the soul. A foothold that provides space for honesty and authenticity. Age and usage are allowed to show here. With their strong character, they give rise to a sense of security. In a modern and subtle way. Suitably safe and true to the style.

# STILTREU USED LOOK. EXPRESSIVE. ACCENTUATED LINES.

# RIEGEL 50

ANNOUNCED.  
LONG FORMAT FOR  
PARTICULARLY  
STRAIGHT-EDGED DESIGN.

7750/455

**CUTTING-EDGE BAR LENGTH. BLUE REDUCTION FIRING OR SINTER PATINA.  
MODEST YET THRILLING.**

Successful modern-day architecture now demands more than just a particularly straight-edged design. Current trends in architecture focus on intelligent building technology for interiors. And the focus for exteriors is on a state of the art outer building skin that breathes by using natural materials. In a much sought after manner, Riegel 50 combines the archaic impression of blue reduction firing, or a subdued sinter patina effect, with the elegant simplicity of the special long format.

# RIEGEL 50 ANNOUNCED. EMPHASIZING LINE. EXTRA LONG.

# HANDSTRICH

EMBODIMENT OF OLD VALUES.  
ENVIRONMENTALLY SOUND,  
HIGH-TECHNOLOGY EXTRUSION.

The figure shows architectural finishing based on the Handstrich series.

**THE EDGES ARE HAND FORMED. THE SURFACE IS WATER-STRUCK.  
THE APPLICATION IS COSMOPOLITAN.**

Clinker brick slips are moving away from their northern niche and experiencing an international renaissance. Handstrich unites the current spirit of sustainability with the original features of traditional clinker bricks.

As it is only possible to make hand formed edges and water-struck surfaces that are frost resistant and easy to lay and use, in combination with thermal insulation systems, by using extruded clinker brick slips sintered in a furnace at 1.300 °C. Without treatment for water-repellency. Without impregnation. And without wasteful cutting of a full brick. Simply Green Tech and cosmopolitan.

# HANDSTRICH HAND FORMED EDGE. WATER-STRUCK SURFACE. BUT GREEN TECH.

# STEINLINGE

UP TO DATE.  
VISIBLE BRICKWORK WITH  
ANTIQUE LOOK.  
MODERN HANDLING.

**ANTIQUE LOOK WITH EASY-TO-LAY, RELIABLE SIZING; ENERGY-CONSCIOUS MYTH APPEARANCE.**

Steinlinge are the descendants, adapted to contemporary clinker standards of the fine old brick era. Steinlinge give a facade the charm of times gone by, while they are at the same time easy to lay thanks to their uniform size.

Fired to be frostproof in high-tech sintering furnaces at 1.300 °C, Steinlinge continue the tradition of masonry with added weatherproofing. These brick veneers are not only permanently easy to clean and use, but in combination with an EIFS system, they are also compliant with all current energy-saving regulations.

# STEINLINGE

## HAND-MADE LOOK. EXACTLY SIZED. MYTHICAL.

# GLANZSTÜCKE

RETRO-BRICK  
WITH SHEEN EFFECT.  
EXTRA SLIM.  
LONG SHAPE.

**EXTRUDED VINTAGE LOOK WITH SHINE EFFECT AND WITH A USED LOOK TEXTURE. QUICK SLURRY APPLICATION.**

Extra slim retro brick in long format 440 x 52 x 14 mm. Cleaner vintage look with unobtrusive shine effect. With a used look texture, but still with a smooth surface appearance.

This brick ensures quick application for laying and turns facades into unmistakable pièces de résistance without the need for joints. And as a high-tech brick veneer in high sinter quality, it's a pièce de résistance of energy-conscious "shell" design.

# GLANZSTÜCKE VINTAGE LOOK. SHINE EFFECT. EXTRA SLIM.

# ZEITLOS

THE HIGH TECH PATINA  
BRICK-SLIP IN SINTERED  
CLINKER QUALITY AND  
PREMIUM STRENGTH

7470/359

**ARCHAIC APPEARANCE WITH DIMENSIONAL PRECISION FOR EASY LAYING,  
ENERGY-AWARE FACED MASONRY LOOK.**

Brick expressionism: old exposed brickwork is having a renaissance. It is almost as if we are happy to have facades crumbling both inside and out. Also mixed. Two high-end sizes in long format 400 x 71 mm and bar shape 400 x 35 mm as well as in NF format 240 x 71 mm allow this trend look. Zeitlos, the extra strong 14 mm thick patina brick slip in quality frost-proof high-tech extruded sinter quality.

There are all sorts of different placing options with variable joint widths and individually customised colour ranges based on eleven tailored colour tones providing lots of unique styles. Even with its natural edges, Zeitlos is safe to apply and easy-care, making it right on trend for facade design even when it comes to the environment, energy and costs.

# ZEITLOS

## ARCHAIC. TECHNICALLY PERFECT. ENERGY-CONSCIOUS.

★ = Discount on pallets. ● = Normally available ex stock. PG = Price group (please see current price list). ❖ = Minimum quantity: each open box will incur a surcharge. <sup>1)</sup> = The Ströher standard for angular accuracy in angled brick slips is based on the DIN 105 standard for exposed clinker brickwork, but with only 50% of the permissible tolerance values. The Ströher specification is thus +/- 1°. This equates to a maximum deviation of +/- 4 mm on the stretcher side and +/- 2 mm on the header side for a corner with the 240 x 115 mm format. The formats shown are illustrative drawings and are not binding. All information without guarantee.

\* Ströher is the only German manufacturer offering a 25-year frost resistance guarantee on the following extruded products that have been correctly installed by a qualified professional tiler: Keraplatte® Selected, Keraplatte® Zoé, Keraplatte® Gravel Blend, Keraplatte® Epos, Keraplatte® Aera T, Keraplatte® Aera, Keraplatte® Roccia X, Keraplatte® Roccia, Keraplatte® Asar, Keraplatte® Terra, Keraplatte® Duro, Terrace slab TerioTec® X Profile, Terrace slab TerioTec® X, Terrace Slab TerioTec®, Stalotec®, Brickwerk, Brick 60, Wasserbrand, Kontur, Stiltreu, Riegel 50, Handstrich, Steinlinge, Glanzstücke, Zeitlos, Keraprotect® and Keravette®. Please find further explanations in our general terms and conditions.

The number required per m<sup>2</sup> for installing mixed long and bar sizes varies depending on the actual mixing ratio, the arrangement of the sizes and on design factors. The following recommendation is therefore only indicative and not binding. Requirements per m<sup>2</sup>: Format 7440: 19 pieces, Format 7435: 24 pieces.

# KERAPROTECT®

THE DISTINCTIVE  
CLASSIC.  
ROUGH AND  
SANDY PROTECTED.

### **ONCE KNOWN AS THE “DUTCH” BRICK SLIP – NOW AN INTERNATIONAL SUCCESS.**

As rough and grainy as sharkskin is the feel of this classic “Dutch” tile to the touch. The unusual clinker look is not the only advantage this sturdy ceramic with the special tunnel kiln quality has to offer.

Whether a new development or the renovation of an older structure, the same questions arise again and again: Is heat being lost too quickly to the outside? Is noise entering the building too easily?

For noise can be as annoying as the unavoidable maintenance costs of other facade claddings. A facade clad with Keraprotect, however, offers you durable protection of extruded ceramics at optimal costs.

# KERAPROTECT®

## COARSE SAND. UNMISTAKEABLE. CLASSIC.

# KERAVETTE®

AGAINST WIND  
AND WEATHER.  
AND TOO HIGH  
ENERGY COSTS.

**ALSO REGARDING COST-EFFECTIVENESS. UNOBTRUSIVE AND YET STILL IMPRESSIVE.**

Keravette gives a facade a new unmistakeable and individual look. No wonder the word “facade” has been adopted from the Italian word “faccia” meaning “face”.

20 beautiful colour tones, numerous formats and surfaces give you a nearly unlimited choice of options. So each facade quite easily becomes unmistakeable.

The material thickness of 8 and 11 mm means this classic among clinker brick slips is not only light but, thanks to the especially high firing temperature, it is also extremely robust. Together with modern thermal insulation, they are also hard to resist when it comes to price.

# KERAVETTE®

## UNCOMPLICATED. UNOBTRUSIVE.

# KERABIG®

NATURAL STONE LOOK  
IN AN ECONOMICALLY  
LARGE FORMAT.

8430/KS14

**NATURAL STONE IN CERAMIC, PARTIALLY CLAD OR FULLY CLAD,  
AND ALWAYS AN EXCITING DESIGN HIGHLIGHT.**

Whether full or part cladding, the natural stone look lends facades a particular flair. This robust ceramic with the Ströher hard glaze comes in nature-inspired colours taken from granite, slate, basalt, marble and porphyry sandstone, and provides long-term protection against the effects of wind and weather. The actual costs of installation are well below those of natural stone and, when combined with an excellent insulation system, energy maintenance costs are also optimized. The large format is an advantage when tiling and the convenient slurry method can be used – for the natural design accent on your facade.

# HOW TO APPLY CLINKER BRICK SLIPS CORRECTLY TO A FACADE

**PREPARATION:** Before applying the slips, the visible dimensions of the window and door lintels need to be worked out. It is rare that the reveal and lintel measurements correspond to the standard brick slip sizes. This is why the joints between the brick slips need to be adjusted. The overview dimensions calculated are then also transferred to the outside corners.

**PROCEDURE:** After working out the heights at the corners of the walls, the angles at the outer corners are applied using the floating-buttering method. “Floating” describes the application of the adhesive using a notched trowel in medium-bed adhesive. “Buttering” means coating the back of the brick slip with adhesive using a spatula or trowel. Before the surface is worked, the connections between stretches of masonry first need to be determined. In most cases, ‘disordered’ joining is recommended in which five head ends per square metre are included. The head visually forms the front end of an entire brick and in the case of clinker slips is cut from the surface using a tile cutter or a radial cutter.

**JOINTING:** After applying the clinker slips and after a corresponding drying time (see the adhesive manufacturer’s instructions), a start can be made on grouting. Clinker slips with smooth surfaces can be processed by the slurry method. There are a number of grouts on the market but some have plastic and pigment additives. For this reason, you should always consult the mortar manufacturer regarding suitability before choosing the grout. All rough, patinated and textured surfaces are grouted with a conventional pointing trowel and a metal float.

Window lintel perfectly replicated with angles.

The corner angles are worked using the floating-buttering method.

Use a string to plumb the clinker area. The clinker slips are pressed into the adhesive bed.

The finished surface. Grouting can be done after the appropriate drying time.

Grouting using pointing trowel and metal float along the horizontal.

The vertical joints can be finished more easily with a smaller pointing trowel.

Jointing with a trowel allows you to create different looks.

Sweeping out the joint gives it a corresponding structure.

With the slurry method, the joints are filled diagonally with the grouting or plaster float. Walls should be worked from top to bottom.

The finished joint pattern. Full masonry stretches are grouted at one go.

The excess grout is washed off diagonally using a plaster float with a sponge or foam pad.

The finished joint pattern after slurry treatment. A wall surface from the GLANZSTÜCKE series.

#### CONVENTIONAL GROUTING WITH POINTING TROWEL

The following Ströher series must be grouted by conventional methods: BRICKWERK, BRICK 60, WASSERBRAND, STILTREU, KONTUR, RIEGEL 50, GLANZSTÜCKE, HANDSTRICH, STEINLINGE, ZEITLOS, KERAPROTECT®

#### GROUTING USING THE SLURRY METHOD

The following Ströher series can be grouted with the slurry method: KERAVETTE®, KERABIG®

# OUTDOOR TESTED FROST PROOF: FUNCTIONAL CERAMICS WITH MEMBRANE EFFECT.

Frost resistance  
25 years guarantee\*

Ströher heavy clay ceramics possess “breathable” capillary channels and a “waterproof” pore structure with a draining, homogenous particle structure. So even the slightest amount of condensation can escape naturally and won't have to force its way out of the tile. We call this the membrane effect. In transitional seasons and depending on the regional location, ceramics in outdoor areas will have to be able to withstand temperature fluctuations of up to 70°C and rapid freeze/thaw cycles. Ströher heavy clay ceramics can do this – compliant with the DIN EN ISO 10545-12 test standard, even beyond the required laboratory conditions.

## WITH 25 YEARS FROST RESISTANCE GUARANTEE.

The highly structured reverse surface of the tensile heavy clay ceramics made from wet clay ensures optimal interlocking with the subsurface. This ensures optimum adhesive tensile strength. In contrast to the ‘glazed’ surface of the dry pressed body, heavy clay ceramics do not come loose even under heat stress, provided they are properly laid.

### DIAGRAMMATIC TILE

Even the smallest amount of condensation that may have collected as a result of the laying conditions cannot escape naturally.

### TILE REVERSE SIDE: TILE

Smooth pore structure on the adhesive surface of the stoneware slab with poor adhesion properties, SEM image at 500X magnification – direct view.

### DIAGRAMMATIC STRÖHER KERAPLATTE®

Water that has penetrated can escape in the quickest possible way through the capillary channels and frost damage will not occur.

### TILE REVERSE SIDE: STRÖHER KERAPLATTE®

Keraplatte® programme with very good adhesion properties, SEM image at 500X magnification – direct view.

\* Ströher is the only German manufacturer offering a 25-year frost resistance guarantee on the following extruded products that have been correctly installed by a qualified professional tiler: Keraplatte® Selected, Keraplatte® Zoé, Keraplatte® Gravel Blend, Keraplatte® Epos, Keraplatte® Aera T, Keraplatte® Aera, Keraplatte® Roccia X, Keraplatte® Roccia, Keraplatte® Asar, Keraplatte® Terra, Keraplatte® Duro, Terrassenplatte TerioTec® X Profile, Terrassenplatte TerioTec® X, Terrassenplatte TerioTec®, Secuton®, Stalotec®, Brickwerk, Brick 60, Wasserbrand, Kontur, Stiltreu, Riegel 50, Handstrich, Steinlinge, Glanzstücke, Zeitlos, Keraprotect® and Keravette®.
